

Publikationen

- (2020): Effect of temperature on the growth and surface bursting of He nano-bubbles in W under fusion-relevant He ion irradiations. In: Fusion Engineering and Design, vol. 163, no. Available online 26 December 2020. DOI: 10.1016/j.fusengdes.2020.112159.
- (2019): The effect of O₂ impurity on surface morphology of polycrystalline W during low-energy and high-flux He⁺ irradiation. In: Fusion Engineering and Design, vol. 139, pp. 96-103. DOI: 10.1016/j.fusengdes.2019.01.003.
- (2018): Surface damages of polycrystalline W and La₂O₃-doped W induced by high-flux He plasma irradiation. In: Journal of Nuclear Materials, vol. 501, no. April, pp. 275-281.
- (2017): Safety studies for the MYRRHA critical core with the SIMMER-III code. In: Annals of Nuclear Energy, vol. 110, pp. 1030-1042. DOI: 10.1016/j.anucene.2017.08.021.
- (2016): High-flux He⁺ irradiation effects on surface damages of tungsten under ITER relevant conditions. In: Journal of Nuclear Materials, vol. 471, no. April, pp. 1-7. DOI: 10.1016/j.jnucmat.2016.01.001.
- (2015): Transient analyses for a molten salt fast reactor with optimized core geometry. In: Nuclear Engineering and Design, vol. 292, no. October, pp. 164-176. DOI: 10.1016/j.nucengdes.2015.06.011.
- (2012): Particle simulation of the nonlinear oscillation of electrons induced by a nanosecond pulse in rf capacitive hydrogen discharges. In: Physics of Plasmas, vol. 19, no. 3. DOI: 10.1063/1.3695121.
- (2010): Comparison of fluorocarbon film deposition by pulsed/continuous wave and downstream radio frequency plasmas. In: Vacuum, vol. 85, no. 2, pp. 253-262.
- (2009): Surface properties of silicon oxide films deposited using low pressure dielectric discharge. In: Applied Surface Science, vol. 255, no. 17, pp. 7708-7712.
- (2006): Properties and deposition processes of a-C: H films from CH₄/Ar dielectric barrier discharge plasmas. In: Surface & Coatings Technology, vol. 200, no. 20-21, pp. 5819-5822.
- (2003): SPM investigation of diamond-like carbon and carbon nitride films. In: Surface & Coatings Technology, vol. 172, no. 2-3, pp. 194-203. DOI: 10.1016/S0257-8972(03)00338-4.
