

Publikationen

- (2008): Advanced techniques for computer-controlled polishing. In: Current Developments in Lens Design and Optical Engineering IX, vol. 7060, no. 70600Q ff.. DOI: 10.1117/12.808036.
- (2008): Forces acting between polishing tool and workpiece surface in magnetorheological finishing. In: Proceedings of SPIE, Volume 7060, Current Developments in Lens Design and Optical Engineering IX (Optical Engineering + Applications, San Diego, CA, USA; August 10-14, 2008). DOI: 10.1117/12.794196.
- (2008): Utilisation of time-variant influence functions in the computer-controlled polishing. In: Precision Engineering, vol. 32, no. 1, pp. 47-54. DOI: 10.1016/j.precisioneng.2007.04.005.
- (2008): Simulation of a complex optical polishing process using a neural network. In: Robotics and Computer-Integrated Manufacturing, vol. 24, no. 1, pp. 32-37. DOI: 10.1016/j.rcim.2006.07.003.
- (2008): Mathematical modelling of influence functions in computer-controlled polishing. Part II. In: Applied Mathematical Modelling, vol. 32, no. 12, pp. 2907-2924.
- (2008): Mathematical modelling of influence functions in computer-controlled polishing. Part I. In: Applied Mathematical Modelling, vol. 32, no. 12, pp. 2888-2906.
- (2007): Calculation of MRF influence functions. In: Optical Manufacturing and Testing VII, SPIE, San Diego, CA, USA.
- (2007): Calculation of MRF influence functions. In: Optical Manufacturing and Testing VII, vol. 6671.
- (2007): Lens production enhancement by adoption of artificial influence functions and a knowledge-based system in a magnetorheological finishing process. In: Optical Manufacturing and Testing VII, vol. 6671, no. September. DOI: 10.1117/12.761356.
- (2007): Filter algorithm for influence functions in the computer-controlled polishing of high-quality optical lenses. In: International Journal of Machine Tools and Manufacture, vol. 47, no. 1, pp. 107-111.
- (2006): Coherences between influence function size, polishing quality and process time in the magnetorheological finishing. In: Current Developments in Lens Design and Optical Engineering VII, San Diego, CA, USA.
- (2006): Simulation of a complex optical polishing process using a neural network. In: Robotics and Computer-Integrated Manufacturing, vol. 24, no. 1, pp. 32-37. DOI: 10.1016/j.rcim.2006.07.003.
- (2006): Coherences between influence function size, polishing quality and process time in the magnetorheological finishing. In: Current Developments in Lens Design and Optical Engineering VII, vol. 6288. DOI: 10.1117/12.678720.
- (2006): Correlation between influence- function quality and predictability of a computer-controlled polishing process. In: Optical Engineering, vol. 45, no. 6. DOI: 10.1117/1.2213630.
- (2005): Comparison of different magnetorheological polishing fluids.
- (2005): New viscosity measurement for magnetorheological polishing fluid. In: Optical Manufacturing and Testing VI, San Diego, CA, USA.
- (2005): A new approach to predict computer-controlled polishing results. In: Optical Manufacturing and Testing VI, San Diego, CA, USA.
- (2005): Comparison of different magnetorheological polishing fluids. In: Optical Fabrication, Testing, and Metrology II, vol. 5965, pp. 659-670. DOI: 10.1117/12.656430.

- (2005): New viscosity measurement for magnetorheological polishing fluid. In: Optical Manufacturing and Testing VI, vol. 5869, pp. 133-141. DOI: 10.1117/12.616690.
- (2005): A new approach to predict computer-controlled polishing results. In: Optical Manufacturing and Testing VI, vol. 5869, pp. 94-102. DOI: 10.1117/12.616780.
- (2004): Temporal stability and performance of MR polishing fluid. In: Current Developments in Lens Design and Optical Engineering V, San Diego, CA, USA.
- (2004): Comparison of a new contact topographical measurement system for spherical and aspherical surfaces with interferometry. In: Current Developments in Lens Design and Optical Engineering V, Denver, CO, USA.
- (2004): Temporal stability and performance of MR polishing fluid. In: Current Developments in Lens Design and Optical Engineering V, vol. 5523, pp. 273-280. DOI: 10.1117/12.558897.
- (2004): Comparison of a new contact topographical measurement system for spherical and aspherical surfaces with interferometry. In: Current Developments in Lens Design and Optical Engineering V, vol. 5523, pp. 225-234. DOI: 10.1117/12.558899.
- (2003): Prediction of MRF polishing by classification of the initial error with Zernike polynomials. In: Optical Manufacturing and Testing V, San Diego, CA, USA.
- (2003): Lens production enhancement by adoption of artificial influence functions and a knowledge-based system in a magnetorheological finishing process. In: Optical Manufacturing and Testing VII, San Diego, CA, USA.
- (2003): Prediction of MRF polishing by classification of the initial error with Zernike polynomials. In: Optical Manufacturing and Testing V, vol. 5180, pp. 115-122. DOI: 10.1117/12.507652.
