

Publikationen

- (2011): Techniques for the Production of High Quality Lenses by the Utilisation of a Knowledge Based System.
- (2008): Advanced techniques for computer-controlled polishing. In: Current Developments in Lens Design and Optical Engineering IX, vol. 7060, no. 70600Q ff.. DOI: 10.1117/12.808036.
- (2008): Utilisation of time-variant influence functions in the computer-controlled polishing. In: Precision Engineering, vol. 32, no. 1, pp. 47-54. DOI: 10.1016/j.precisioneng.2007.04.005.
- (2008): Simulation of a complex optical polishing process using a neural network. In: Robotics and Computer-Integrated Manufacturing, vol. 24, no. 1, pp. 32-37. DOI: 10.1016/j.rcim.2006.07.003.
- (2008): Mathematical modelling of influence functions in computer-controlled polishing. Part II. In: Applied Mathematical Modelling, vol. 32, no. 12, pp. 2907-2924.
- (2008): Mathematical modelling of influence functions in computer-controlled polishing. Part I. In: Applied Mathematical Modelling, vol. 32, no. 12, pp. 2888-2906.
- (2007): Calculation of MRF influence functions. In: Optical Manufacturing and Testing VII, SPIE, San Diego, CA, USA.
- (2007): Calculation of MRF influence functions. In: Optical Manufacturing and Testing VII, vol. 6671.
- (2007): Subsurface damages detecting on standard optical glass by dimple method. In: The 12th International Conference on Problems of Material Engineering, Mechanics and Design, Jasna, Slowakei.
- (2007): Lens production enhancement by adoption of artificial influence functions and a knowledge-based system in a magnetorheological finishing process. In: Optical Manufacturing and Testing VII, vol. 6671, no. September. DOI: 10.1117/12.761356.
- (2007): Design and development of a novel computer-controlled power device for electrical-assisted optical grinding. In: Optifab 2007: Technical Digest, volume TD04.
- (2007): Subsurface damages detecting on standard optical glass by dimple method. In: Proceedings of the 12th International Conference on Problems of Material Engineering, Mechanics and Design, Jasna, Slowakei.
- (2007): Correcting silicon carbide and silicon nitride moulds by Magnetorheological Finishing. In: Proceedings of the 7th euspenn International Conference, Bremen, Vol. 2.
- (2007): Filter algorithm for influence functions in the computer-controlled polishing of high-quality optical lenses. In: International Journal of Machine Tools and Manufacture, vol. 47, no. 1, pp. 107-111.
- (2006): Coherences between influence function size, polishing quality and process time in the magnetorheological finishing. In: Current Developments in Lens Design and Optical Engineering VII, San Diego, CA, USA.
- (2006): Zonale Bearbeitung optischer Flächen und ihre Modellierung. In: BayTech Optik Seminar, Deggenedorf.
- (2006): Sedimentations on high-precision surfaces of advanced materials by magnetorheological finishing. In: Current Developments in Lens Design and Optical Engineering VII, San Diego, CA, USA.
- (2006): Rauigkeitsentwicklung bei der Bearbeitung von Komponenten für die Präzisionsoptik mit Diamantwerkzeugen. In: Sechstes Symposium - Zukunft Glas - von der Tradition zum High-Tech-Produkt, OTTI, Zwiesel.
- (2006): Deposits and damages on high precision surfaces of advanced materials. In: 5th Youth Symposium on Experimental Solid Mechanics, Puchov, Slowakei.

- (2006): Simulation of a complex optical polishing process using a neural network. In: Robotics and Computer-Integrated Manufacturing, vol. 24, no. 1, pp. 32-37. DOI: 10.1016/j.rcim.2006.07.003.
- (2006): Coherences between influence function size, polishing quality and process time in the magnetorheological finishing. In: Current Developments in Lens Design and Optical Engineering VII, vol. 6288. DOI: 10.1117/12.678720.
- (2006): Sedimentations on high-precision surfaces of advanced materials by magnetorheological finishing. In: Current Developments in Lens Design and Optical Engineering VII, vol. 6288.
- (2006): Rauigkeitsentwicklung bei der Bearbeitung von Komponenten für die Präzisionsoptik mit Diamantwerkzeugen. In: Sechstes Symposium - Zukunft Glas - von der Tradition zum High-Tech-Produkt, OTTI, Zwiesel.
- (2006): Deposits and damages on high precision surfaces of advanced materials. In: Proceedings of the 5th Youth Symposium on Experimental Solid Mechanics, Puchov, Slowakei.
- (2006): Correlation between influence- function quality and predictability of a computer-controlled polishing process. In: Optical Engineering, vol. 45, no. 6. DOI: 10.1117/1.2213630.
- (2005): Praktische Erläuterungen zu den ATV DIN 18299 und DIN 18340. In: VOB-C-Kommentar - Trockenbauarbeiten, Köln.
- (2005): Comparison of different magnetorheological polishing fluids.
- (2005): New viscosity measurement for magnetorheological polishing fluid. In: Optical Manufacturing and Testing VI, San Diego, CA, USA.
- (2005): Fertigungs- und Messtechnik an präzisen optischen Flächen. In: BayTech Optik Seminar, Deggendorf.
- (2005): Utilizing a TII aspherical measurement machine in a computer-controlled polishing process. In: Optical Measurement Systems for Industrial Inspection IV, München.
- (2005): A new approach to predict computer-controlled polishing results. In: Optical Manufacturing and Testing VI, San Diego, CA, USA.
- (2005): Analysis of thermal sources in a magnetorheological finishing (MRF) process. In: Optical Manufacturing and Testing VI, San Diego, CA, USA.
- (2005): Comparison of different magnetorheological polishing fluids. In: Optical Fabrication, Testing, and Metrology II, vol. 5965, pp. 659-670. DOI: 10.1117/12.656430.
- (2005): New viscosity measurement for magnetorheological polishing fluid. In: Optical Manufacturing and Testing VI, vol. 5869, pp. 133-141. DOI: 10.1117/12.616690.
- (2005): Analysis of thermal sources in a magnetorheological finishing (MRF) process. In: Optical Manufacturing and Testing VI, vol. 5869, pp. 111-120. DOI: 10.1117/12.616751.
- (2005): A new approach to predict computer-controlled polishing results. In: Optical Manufacturing and Testing VI, vol. 5869, pp. 94-102. DOI: 10.1117/12.616780.
- (2005): Utilizing a TII aspherical measurement machine in a computer-controlled polishing process. In: Optical Measurement Systems for Industrial Inspection IV, vol. 5856, pp. 987-993. DOI: 10.1117/12.612597.
- (2005): MRF in der Praxis – Optimierung der Wirtschaftlichkeit. In: BayTech Optik Seminar, Deggendorf.
- (2004): Temporal stability and performance of MR polishing fluid. In: Current Developments in Lens Design and Optical Engineering V, San Diego, CA, USA.
- (2004): Erzeugung hochpräziser Oberflächen auf optischen Bauelementen für die Präzisionsoptik mit magnetorheologischem Finishing (MRF). In: Fünftes Symposium - Zukunft Glas - Von der Tradition zum High-Tech-Produkt, Zwiesel.

- (2004): Comparison of a new contact topographical measurement system for spherical and aspherical surfaces with interferometry. In: Current Developments in Lens Design and Optical Engineering V, Denver, CO, USA.
- (2004): Temporal stability and performance of MR polishing fluid. In: Current Developments in Lens Design and Optical Engineering V, vol. 5523, pp. 273-280. DOI: 10.1117/12.558897.
- (2004): Comparison of a new contact topographical measurement system for spherical and aspherical surfaces with interferometry. In: Current Developments in Lens Design and Optical Engineering V, vol. 5523, pp. 225-234. DOI: 10.1117/12.558899.
- (2004): Erzeugung hochpräziser Oberflächen auf optischen Bauelementen für die Präzisionsoptik mit magnetorheologischem Finishing (MRF). In: Fünftes Symposium - Zukunft Glas - von der Tradition zum High-Tech-Produkt, page 8998. OTTI.
- (2003): Prediction of MRF polishing by classification of the initial error with Zernike polynomials. In: Optical Manufacturing and Testing V, San Diego, CA, USA.
- (2003): Lens production enhancement by adoption of artificial influence functions and a knowledge-based system in a magnetorheological finishing process. In: Optical Manufacturing and Testing VII, San Diego, CA, USA.
- (2003): Prediction of MRF polishing by classification of the initial error with Zernike polynomials. In: Optical Manufacturing and Testing V, vol. 5180, pp. 115-122. DOI: 10.1117/12.507652.
