

Publikationen

- (2020): Generating consumer load profiles to assess demand-side management potential of industries. Paper ID: 1063. In: Energy Proceedings 2020 - Proceedings of 11th International Conference on Applied Energy (12-15 August 2019; Västerås, Sweden).
- (2020): Unveiling the potential for combined heat and power in Chilean industry-A policy perspective. In: Energy Policy, vol. 140, no. May. DOI: 10.1016/j.enpol.2020.111331.
- (2020): Unsupervised grouping of industrial electricity demand profiles: synthetic profiles for demand-side management applications. In: Energy, vol. 215 (Part A), no. Available online 1 October 2020. DOI: 10.1016/j.energy.2020.118962.
- (2019): Gestión de la Demanda en la Industria de Chile: Aprendiendo del Caso Alemán (Demand Side Management on the Chile Industry: Learning From the German Case). In: Ingeniería, vol. 24, no. 3. DOI: 10.14483/23448393.14709.
- (2019): Energy Modelling in Rural Areas with Spatial and Temporal Data in Germany and Czech Republic. In: Proceedings of the 5th International Conference on Geographical Information Systems Theory, Applications and Management (GISTAM2019) [May 3-5, 2019; Heraklion, Crete, Greece], vol. Vol. 1.
- (2019): Using spatiotemporal data to evaluate renewable electricity self-sufficiency of municipalities and states in Bavaria and the Czech Republic. In: Geophysical Research Abstracts, vol. 21.
- (2019): Potential of the paper industry as system flexibility provider for an electrical system with high renewable energy share in Chile. In: Geophysical Research Abstracts, vol. 21.
- (2019): A new perspective on global renewable energy systems: why trade in energy carriers matters. In: Energy & Environmental Science, vol. 12, no. 7, pp. 2022-2029. DOI: 10.1039/C9EE00223E.
- (2019): Industry, flexibility, and demand response: Applying German energy transition lessons in Chile. In: Energy Research & Social Science, vol. 54, no. August, pp. 12-25. DOI: 10.1016/j.erss.2019.03.003.
- (2019): Assessment of on-site steady electricity generation from hybrid renewable energy systems in Chile. In: Applied Energy, vol. 250, no. 15 September 2019, pp. 1548-1558. DOI: 10.1016/j.apenergy.2019.05.005.
- (2019): Can Geoinformation Help to Better Protect Informal Settlements? - A Concept For the City of Medellín. In: Gi4DM 2019 – Geoinformation for Disaster Management, vol. XLII-3/W8. DOI: 10.5194/isprs-archives-XLII-3-W8-115-2019.
- (2019): Assessing Middle and Low Voltage Grid Requirements in Bavaria for the Decades to Come. In: Shaping a Sustainable Energy Future: 9th Colloquium of the Munich School of Engineering (August 1, 2019).
- (2019): Assessing Middle and Low Voltage Grid Requirements in Bavaria for the Decades to Come. In: 9th Energy Colloquium of the Munich School of Engineering, Shaping a Sustainable Energy Future, Garching Hochbrück.
- (2019): Electricity demand forecast for Bavaria and the Czech Republic until 2050: can variable renewables cope with it?. In: 11th International Conference on Applied Energy (ICAE2019), Västerås, Sweden.
- (2019): A spatially explicit assessment of middle and low voltage grid requirements in Bavaria until 2050. In: Geoscape, vol. 13, no. 2, pp. 88-97. DOI: 10.2478/geosc-2019-0008.
- (2019): Potential Analysis of Hybrid Renewable Energy Systems for Self-Sufficient Residential Use in Germany and the Czech Republic. In: Energies, vol. 12, no. 21. DOI: 10.3390/en12214185.

- (2019): Energy Modelling in Rural Areas with Spatial and Temporal Data in Germany and Czech Republic. In: 6th International Conference on Geographical Information Systems Theory, Applications and Management (GISTAM), Heraklion, Kreta, Greece.
- (2019): Using spatiotemporal data to evaluate renewable electricity self-sufficiency of municipalities and states in Bavaria and the Czech Republic. In: European Geosciences Union (EGU) General Assembly 2019, Wien, Österreich.
- (2019): A spatially explicit assessment of middle and low voltage grid requirements in Bavaria until 2050. In: Symposium GIS Ostrava 2019, Ostrava, Tschechische Republik.
- (2019): Cogeneración en Chile: Capacidades, desarrollo y perspectivas. In: Memorias de la XLI Reunión de Trabajo de la ASADES (Nov 5-10, 2018;Cordoba, Argentina).
- (2019): Assessing variables of regional reanalysis data sets relevant for modelling small-scale renewable energy systems. In: Renewable Energy, vol. 133, no. April, pp. 1468-1478. DOI: 10.1016/j.renene.2018.09.015.
- (2019): Assessment of on-site steady electricity generation from renewable energy sources in Chile. In: Energy Procedia (Contributions to the 10th International Conference on Applied Energy ICAE 2018), vol. 158. DOI: 10.1016/j.egypro.2019.01.266.
- (2019): Hybrid renewable energy systems to supply electricity to self-sufficient residential buildings in Central Europe. In: Energy Procedia (Contributions to the 10th International Conference on Applied Energy ICAE 2018), vol. 158. DOI: 10.1016/j.egypro.2019.01.096.
- (2018): Cogeneración en Chile: Capacidades, desarrollo y perspectivas. In: Avances en Energías Renovables y Medio Ambiente (AVERMA), vol. 22.
- (2018): Assessing regional reanalysis data sets for planning small-scale renewable energy system. In: 20th EGU General Assembly, EGU2018, Proceedings from the conference held 4-13 April, 2018 in Vienna, Austria, p.4996.
- (2018): Spatiotemporal modelling for integrated spatial and energy planning. In: Energy, Sustainability and Society, vol. 8, no. 1, pp. 1-29. DOI: 10.1186/s13705-018-0174-z.
- (2018): A review of spatial localization methodologies for the electric vehicle charging infrastructure. In: International Journal of Sustainable Transportation, pp. 1-17. DOI: 10.1080/15568318.2018.1481243.
- (2018): Assessment of complementarity between wind power and photovoltaic installations to supply residential electric demand in Germany and the Czech Republic. In: International Symposium on Regional Reanalysis (ISRR) 2018, Bonn.
- (2018): Does the mix make the magic? Spatiotemporal modelling to assess residential electricity self-sufficiency based on photovoltaics, wind power and batteries. In: AGIT Symposium & Expo 2018 - Angewandte Geoinformatik, Salzburg, Österreich.
- (2018): Mapping minimum technical requirements for electricity self-sufficiency of single-family houses using regional reanalysis data and satellite imagery derived data. In: European Geosciences Union (EGU) General Assembly 2018, Wien, Österreich.
- (2018): Assessing variables of regional reanalysis data sets relevant for modelling small-scale renewable energy systems. In: European Geosciences Union (EGU) General Assembly 2018, Wien, Österreich.
- (2018): Country wide evaluation of electricity self-sufficiency of single family houses in Germany and Czech Republic. Posterpräsentation. In: International Renewable Energy Conference (IRES) 2018, Düsseldorf.
- (2018): Maps of Germany and the Czech Republic with photovoltaic and battery system sizes for electricity self-sufficient single-family houses under 18 technical and weather dependent scenarios (Mendeley Open Access Data Set). DOI: 10.17632/txvbyxpb9t.1.
- (2018): Mapping minimum technical requirements for electricity self-sufficiency of single-family houses using regional reanalysis data and satellite imagery derived data. In: Geophysical Research Abstracts, vol. 20, no. EGU2018-12577.

- (2018): Aportes de la Industria productiva a la flexibilidad del sistema eléctrico: Una comparación entre los casos Alemán y Chileno. In: Memorias de la 19. Convención científica de ingeniería y arquitectura de la Habana, Cuba.
- (2018): Electricity self-sufficiency of single-family houses in Germany and the Czech Republic. In: Applied Energy, vol. 228, no. 15 October 2018, pp. 902-915. DOI: 10.1016/j.apenergy.2018.06.118.
- (2017): Energiezonenplanung Plus (EZP+): Open-source Tool für die Planung von Fernwärmenetzen anhand von hochaufgelösten räumlich-zeitlichen Daten. In: 29. AGIT-Symposium und EXPO Angewandte Geoinformatik, Salzburg, Österreich.
- (2017): CrossEnergy: cross-border energy infrastructure – future perspectives for a region in change. In: 5th UNI-SET Energy Clustering Event; Universities in the Energy Transition: Science & Skills for Renewables Integration, Leuven, Belgien.
- (2017): C3S-Reanalysen: Ertragspotentiale von Erneuerbaren Energien / Solarenergie. In: Nationales Forum für Fernerkundung und Copernicus 2017 "Copernicus@work", Berlin.
- (2017): Spatiotemporal modelling for renewable distributed energy generation planning for municipalities.
- (2017): Energiezonenplanung Plus (EZP+): Open-source Tool für die Planung von Fernwärmenetzen anhand von hochaufgelösten räumlich-zeitlichen Daten. In: AGIT 3-2017, Berlin; Offenbach/Main.
- (2016): Optimal sizing of active solar energy and storage systems for energy plus houses. In: Proceedings of the 11th ISES EuroSun Conference - International Conference on Solar Energy for Buildings and Industry (October 11-14 2016;Palma de Mallorca, Spain), <https://doi.org/10.18086/eurosun.2016.01.08>. DOI: 10.18086/eurosun.2016.01.08.
- (2016): Optimal sizing of active solar energy and storage systems for energy plus houses. Session on Solar Architecture and Net Zero Energy Buildings. In: 11th ISES EuroSun Conference - International Conference on Solar Energy for Buildings and Industry, Palma de Mallorca, Spanien.
- (2016): Integrating satellite imagery-derived data and GIS-based solar radiation algorithms to map solar radiation in high temporal and spatial resolutions for the province of Salta, Argentina. In: Proceedings of the SPIE Remote Sensing Conference - Earth Resources and Environmental Remote Sensing/GIS Applications (September 27-29 2016; Edinburgh, GB).
- (2016): Integrating satellite imagery-derived data and GIS-based solar radiation algorithms to map solar radiation in high temporal and spatial resolutions for the province of Salta, Argentina. (Session 3 - Processing Methodologies I). In: SPIE Remote Sensing Conference (Earth Resources and Environmental Remote Sensing/GIS Applications), Edinburgh, Großbritannien.
- (2016): Impact of small-scale storage systems on the photovoltaic penetration potential at the municipal scale. In: Energy Procedia (Special Issue: European Geosciences Union General Assembly 2016 - Division Energy, Resources and Environment [ERE], EGU 2016), April 17th-22nd 2016; Vienna, Austria), vol. 97.
- (2016): Impact of small-scale storage systems on the photovoltaic penetration potential at the municipal scale. In: Geophysical Research Abstracts, vol. 18.
- (2016): Impact of small-scale storage systems on the photovoltaic penetration potential at the municipal scale. (Session ERE3.1 Energy meteorology and spatial modelling of renewable energies). In: European Geosciences Union (EGU) General Assembly 2016, Wien, Österreich.
- (2016): Comparison of satellite imagery based data, reanalysis data and statistical methods for mapping global solar radiation in the Lerma Valley (Salta, Argentina). In: Renewable Energy, vol. 99, no. Dezember, pp. 57-68. DOI: 10.1016/j.renene.2016.06.042.
- (2016): Technical, Economical and Social Assessment of Photovoltaics in the Frame of the Net-Metering Law for the Province of Salta, Argentina. In: Energies, vol. 9, no. 3 (Article number 133). DOI: 10.3390/en9030133.
- (2015): Comparación de fuentes satelitales, de re-análisis y métodos estadísticos para el mapeo de la radiación solar en el valle de Lerma (Salta-Argentina). In: Acta de la XXXVIII Reunión de Trabajo de la Asociación Argentina de Energías Renovables y Medio Ambiente; INENCO: Salta, Argentina, vol. 3.

- (2015): Aportes a la planificación energética en salta. información de base, marco legal y desafíos al corto plazo. In: Acta de la XXXVIII Reunión de Trabajo de la Asociación Argentina de Energías Renovables y Medio Ambiente; INENCO: Salta, Argentina, vol. 3.
- (2015): Modell zur regionalen Optimierung der Stromversorgung aus Photovoltaik. In: Bavarian Journal of Applied Sciences, vol. 1, no. 1, pp. 14-26. DOI: 10.25929/ykqj-5g62.
- (2015): Spatiotemporal modeling for assessing complementarity of renewable energy sources in distributed energy systems. In: ISPRS International Workshop on Spatiotemporal Computing, Fairfax, VA, USA.
- (2015): Spatio-temporal Modeling for Renewable Distributed Energy Generation Planning at the Municipal Scale. In: SMARTGREENS 2015 (4th International Conference on Smart Cities and Green ICT Systems), Lissabon, Portugal.
- (2015): Spatial Energy Manager: GIS-gestütztes kommunales Energiemanagementsystem zur Planung regionaler virtueller Kraftwerke. In: 2. Tag der Forschung, Deggendorf.
- (2015): Photogrammetric point clouds for GIS-based high-resolution estimation of solar radiation for roof-top solar systems. In: GIS Ostrava 2015 Surface models for geosciences, Ostrava, Tschechische Republik.
- (2015): Spatio-temporal Modeling for Renewable Distributed Energy Generation Planning at the Municipal Scale. In: Proceedings of SMARTGREENS 2015 (4th International Conference on Smart Cities and Green ICT Systems) [May 20 - 22, 2015;Lisbon, Portugal].
- (2015): Spatiotemporal modeling for assessing complementarity of renewable energy sources in distributed energy systems. In: ISPRS Annals of Photogrammetry, Remote Sensing and Spatial Information Sciences, no. II-4/W2, pp. 147-154. DOI: 10.5194/isprsannals-II-4-W2-147-2015.
- (2015): Photogrammetric point clouds for GIS-based high-resolution estimation of solar radiation for roof-top solar systems. In: Surface Models for Geosciences, [S.I.].
- (2015): UAS-basierte Dachflächenerfassung als Berechnungsgrundlage für eine räumlich und zeitlich hochaufgelöste Photovoltaikprognose. In: Angewandte Geoinformatik 2015, Berlin.
- (2015): FOSS4G-based energy management system for planning virtual power plants at the municipal scale. In: Geomatics Workbooks, no. 12, pp. 159-164.
- (2015): Dachflächenrekonstruktion zur räumlichen und zeitlichen Verbesserung von Photovoltaikprognosen. In: Leitfaden 3D-GIS und Energie, München.
- (2015): Spatio-temporal modeling of roof-top photovoltaic panels for improved technical potential assessment and electricity peak load offsetting at a municipal scale. In: Computers, Environment and Urban Systems, vol. 52, no. July, pp. 58-69. DOI: 10.1016/j.compenvurbsys.2015.03.002.
- (2014): Energiekonzept Waldthurn. Projektbericht.
- (2014): Zeitlich und räumlich hochaufgelöste Modellierung der potentiellen solaren Einstrahlung - ein Methodenvergleich. In: AGIT Symposium & Expo 2014 - Angewandte Geoinformatik, Salzburg, Österreich.
- (2014): Photovoltaik in virtuellen Kraftwerken zur Versorgung regionaler Elektromobilitätskonzepte. In: AGIT Symposium & Expo 2014 - Angewandte Geoinformatik, Salzburg, Österreich.
- (2014): Zeitlich und räumlich hochaufgelöste Modellierung der potentiellen solaren Einstrahlung - ein Methodenvergleich. In: Angewandte Geoinformatik 2014, Berlin.
- (2014): Photovoltaik in virtuellen Kraftwerken zur Versorgung regionaler Elektromobilitätskonzepte. In: Angewandte Geoinformatik 2014, Berlin.
