

## Publikationen

- (2016): Sensor unit.
- (2012): Method for producing an optical splitter cascade and optical assembly.
- (2011): Ion exchange technology for optical waveguides. In: Optik & Photonik (Optical Components), no. 12, pp. 32-34. DOI: 10.1002/opph.201190385.
- (2011): Passive optical component for use as combiner in optical plug connection system for connection of light wave spacer in high speed fiber lasers, has support substrate halves connected with guide halves such the guide halves form wave guides.
- (2002): A refractive free space micro-optical 4x4 interconnect on chip-level with optical fan-out fabricated by the LIGA-technique. In: IEEE Photonics Technology Letters.
- (2002): A refractive free space micro-optical 4x4 interconnect with aspherical lenses and fan-out. In: Hereaus Workshop on Micro-Optics.
- (2001): Optisches Backplane-Konzept auf der Basis von Wellenleiteroptik kombiniert mit Freiraumoptik. In: wt Werkstatttechnik online, vol. 91, no. 12.
- (2001): LIGA und seine Anwendungen.
- (2001): Novel optical backplane for automotive applications. In: IEEE Transactions C.
- (2000): Novel Optical Backplane for Automotive Applications. In: Proceedings of the 9th IFAC Symposium on Control in Transportation Systems 2000, vol. Vol. 33, Issue 9.
- (2000): Micro-Optics for Optical Interconnects in Automotive Applications. In: Advanced Microsystems for Automotive Applications 2000, Berlin, Heidelberg.
- (2000): Combination of guided wave and free space micro-optics for a new optical backplane concept. In: Proceedings of SPIE Vol. 4430: ROMOPTO 2000, Sixth Conference on Optics.
- (1999): Performance simulations of multi-chip-module interconnects: Comparing guided-wave and free-space pathways. In: Journal of the European Optical Society (JEOS) - Special Issue on Optics in Computing, vol. 1, no. 2 (March), pp. 255-261.
- (1999): Performances of optical multi-chip-module interconnects: comparing guided-Wave and free-space pathways. In: Journal of Optics A: Pure and Applied Optics, vol. 1, no. 2, pp. 255-261. DOI: 10.1088/1464-4258/1/2/027.
- (1999): Deep Proton Lithographic CAD-CAM for the fabrication of Monolithic Micro-optical Elements. In: 1998 IEEE /LEOS Summer Topical Meeting. Digest. Broadband Optical Networks and Technologies: An Emerging Reality. Optical MEMS. Smart Pixels. Organic Optics and Optoelectronics.
- (1999): Refraktive Mikrooptik für optische Intrachip Verbindungen. In: Tagungsband zum ITG-Workshop Photonische Integration und Aufbautechnik (Berlin).
- (1999): Parallel optical interconnetion using self adjusting microlenses on injection moulded ferrules made by LIGA technique. In: Proceedings of Optical System Design and Production.
- (1999): Refractive Microlens Arrays made by Deep Proton Lithgraphy: technology and characterisation. In: Proceedings of the 7th Microoptics Conference MOC'99.

- (1998): Performance simulations of optical multi-chip-module interconnects: Comparing guided-wave and free-space pathways. In: Proceedings of SPIE Vol. 3490: Optics in Computing '98.
- (1998): Guided-wave versus free-space pathways for optical intra-multi-chip-module interconnects: Performance simulations and design rules. In: Proceedings of the 1998 International Optical Design Conference, Washington, D. C..
- (1998): Advanced Fabrication Method for Monolithic Micro-optical Elements using Deep Proton Lithography and CAD-CAM. In: Proceedings of the IEEE/LEOS BENELUX Chapter Workshop.
- (1998): Technological Aspects of Deep Proton Lithography for the Fabrication of Micro-optical Elements for Photonics in Computing Applications. In: Proceedings of SPIE Vol. 3490: Optics in Computing '98.
- (1998): Micro-optics for optical interconnects. In: International Journal of Optoelectronics, vol. 12, no. 4, pp. 119-126.
- (1998): Technological Aspects of Deep Proton Lithography for the Fabrication of Micro-optical Elements for Optical Interconnects. In: Optical Fabrication and Testing, Washington, DC, USA, vol. Vol. 12.
- (1998): Demonstration of a Monolithic Micro-Optical Bridge for Free-Space Intrachip Interconnects. In: Diffractive Optics and Micro-optics, vol. Vol. 10.
- (1998): Arrays of Spherical Microlenses Fabricated with Deep Proton Lithography. In: Proceedings of the Symposium IEEE/LEOS Benelux Chapter.
- (1998): Spherical Microlenses Fabricated with Deep Proton Lithography. In: Proceedings of the IEEE/LEOS BENELUX Chapter Workshop.
- (1998): Fabrication and experimental demonstration of a multi-channel module for intra-MCM optical interconnects. In: Summaries of Papers Presented at the Conference on Lasers and Electro-Optics. Conference Edition., vol. Technical Digest Series. DOI: 10.1109/CLEO.1998.676285.
- (1998): Demonstration of a Monolithic Multichannel Module for Multi-Gb/s Intra- MCM Optical Interconnects. In: IEEE Photonics Technology Letters, vol. 10, no. 11, pp. 1629-1631. DOI: 10.1109/68.726772.
- (1998): Experimental demonstration of a multi-channel micro-optical bridge for multi-Gb/s, free-space intra MCM interconnects. In: Proceedings of SPIE Vol. 3490: Optics in Computing '98.
- (1998): Demonstration of a 16-channel micro-optical interconnection module for free-space intra-MCM data communication. In: Proceedings of the Symposium IEEE/LEOS Benelux Chapter.
- (1998): A Cascadable Polarization-Based 1 to 9 Multimode Optical Fiber Switch using a PMMA Fiber Array Holder. In: IEEE Journal of Lightwave Technology, vol. 16, no. 8, pp. 1464-1472. DOI: 10.1109/50.704612.
- (1998): Demonstration of a compact polarisation based two-dimensional multimode optical fibre space switch as optical fibre sensor multiplexer. In: Proceedings of the Conference on Lasers and Electro-Optics Europe (CLEO EUROPE), Piscataway, NJ, USA. DOI: 10.1109/CLEOE.1998.719329.
- (1997): Micro-optics and lithography. ISBN: 978-9054871675.
- (1997): Optical performance analysis of free-space and guided-wave optical pathway blocks for intra-MCM interconnects. In: Proceedings of the Second IEEE/LEOS symposium Benelux chapter, Eindhoven, The Netherlands.
- (1997): Technological aspects of deep proton lithography for the fabrication of micro-optical elements. In: Proceedings of the Second IEEE/LEOS symposium Benelux chapter, Eindhoven, The Netherlands.
- (1997): Experimental demonstration of free space intrachip micro-optical interconnect. In: Proceedings of the Second IEEE/LEOS symposium Benelux chapter, Eindhoven, The Netherlands.
- (1996): Irradiation protonique en volume: un outil pour la fabrication de composants micro-optique. In: Entropie, no. 192/193, pp. 9-14.
- (1996): Intrachip interconnect with a monolithic free space optical bridge. In: Proceedings 1996 IEEE/LEOS Symposium, Enschede.

- (1996): Microlenses fabricated by UV excimer laser irradiation of PMMA followed by styrene diffusion. In: Applied Optics, vol. 35, no. 22, pp. 4471-4475. DOI: 10.1364/AO.35.004471.
- (1996): Monolithische Integration von Mikromechanik und Mikrooptik für optische Kurzstreckenverbindungen. In: Tagungsband zum 4. Workshop "Optik in der Rechentechne (ORT)".
- (1996): Optoelectronic subsystems for information processing with PnpN optical thyristors. In: Proceedings of the International Topical Meeting on Optical Computing.
- (1995): Microlenses in PMMA fabricated by particle or electromagnetic irradiation and monomer diffusion. In: Microlens Arrays, vol. Vol. 5.
- (1995): Refractive Microprisms with Improved Surface Quality by Proton Polishing. In: Optical Computing, Washington, D. C., vol. Vol. 10.
- (1995): Integration of microlens and fiber holder arrays by deep proton irradiation. In: Optical Computing, London, vol. 139.
- (1995): Monolithic integration of microlens arrays and fiber holder arrays in PMMA with fiber selfcentering. In: Optics Letters, vol. 20, no. 3, pp. 276-278. DOI: 10.1364/OL.20.000276.
- (1995): High quality flat surfaces in refractive microoptics fabricated by deep proton irradiation. In: Optique et information, vol. Vol. 6.
- (1995): Fabrication of monolithic integrated fiber-lens connector arrays by deep proton irradiation. In: Microsystems Technology, vol. 2, no. 1, pp. 114-118. DOI: 10.1007/BF02739541.
- (1994): 2D fiber connector based on refractive and diffractive optics for intracomputer communication. In: OSA Proceedings of the International Optical Design Conference, Washington, DC.
- (1994): Fiber array alignment using deep proton irradiation. In: ICO Topical Meeting on Frontiers in Information Optics.
- (1993): 3D integration of refractive microoptical components by deep proton irradiation. In: Pure and Applied Optics: Journal of the European Optical Society Part A, vol. 2, no. 2, pp. 111-124. DOI: 10.1088/0963-9659/2/2/004.
- (1993): Microlenses in PMMA with high relative aperture: A parameter study. In: Pure and Applied Optics: Journal of the European Optical Society Part A, vol. 2, no. 1, pp. 9-19. DOI: 10.1088/0963-9659/2/1/003.
- (1993): Monolithically integrated refractive optical interconnection networks", Miniature and Micro-Optics and Micromechanics. In: Proceedings of SPIE Vol. 1992:Miniature and Micro-optic and Micromechanics.
- (1993): Microlenses in PMMA by deep proton irradiation - capacity of the process. In: Microlens Arrays, vol. Vol. 2.
- (1993): Application of three-dimensional micro-optical components formed by lithography, electroforming, and plastic molding. In: Applied Optics, vol. 3232, no. 92, pp. 6464-6469. DOI: 10.1364/AO.32.006464.
- (1993): Deep proton irradiation of PMMA for a 3D integration of micro-optical components. In: Integrated Optics and Micro-Optics with Polymers, Wiesbaden.
- (1993): Microlenses in PMMA with high relative aperture; fabricated by proton irradiation combined with monomer diffusion. In: Optical Information Technology, Berlin; Heidelberg. DOI: 10.1007/978-3-642-78140-7\_7.
- (1992): A fabrication method for microlenses with high relative apertures in PMMA. In: Proceedings of SPIE Vol. 1806: Optical Computing.
- (1992): Microoptical setup with microlenses and microprisms based on refractive optics. In: Proceedings of SPIE Vol. 1806: Optical Computing.
- (1992): A new monolithic integration method for microprisms, microbeamsplitters and microlenses in PMMA. In: Proceedings of the 8th Workshop on Optics in Computing.

- (1992): Untersuchungen zur tiefenlithographischen Strukturierung von PMMA. KfK-Primärbericht Nr. 41.01.03.P.02 A.
- (1991): Microlenses in polymethyl methacrylate with high relative aperture. In: Applied Optics, vol. 30, no. 19, pp. 2666-2667. DOI: 10.1364/AO.30.002666.
- (1990): Application of diffusion and photo-sensitizing techniques in PMMA to optical interconnects. In: Proceedings of SPIE Vol. 1319: Optics in Complex Systems. DOI: 10.1117/12.22159.
- (1990): H<sup>+</sup>-Lithography for 3-D integration of optical circuits. In: Applied Optics, vol. 29, no. 26, pp. 3723-3724. DOI: 10.1364/AO.29.003723.
- (1990): Highly parallel arithmetic algorithms for a digital optical processor using symbolic substitution logic. In: Applied Optics, vol. 29, no. 11, pp. 1610-1618. DOI: 10.1364/AO.29.001610.
- (1990): Design and simulation of optical architectures. In: Proceedings of the International Symposium of Optics in Computing.
